Quran Radio Cairo - UX Scenario

misrquran.radio v1.0.0

App Name: Quran Radio Cairo

Platform: LG webOS TV

Category: Entertainment / Religious

Language: Arabic / English

1. App Overview

Purpose

- Stream Holy Quran Radio from Cairo live 24/7
- Display today's broadcast schedule from official misrquran.gov.eg API
- Show prayer times based on user location with automatic Azan

Target Audience

- Muslim community worldwide
- Arabic and non-Arabic speaking users

Technical Requirements

- Internet connection required for streaming and API data
- No login or account required
- No in-app purchases

2. Main Screen Layout

Left Panel - Today's Schedule

Shows full day broadcast schedule from official API

Current program highlighted with teal badge

Auto-scrolls to currently playing program

Right Panel - Player & Info

Play/Stop button for live radio stream (HLS)

Now Playing: current program name, description, time

Prayer times with next prayer highlighted

Location toggle button for local prayer times

3. User Flow: Playing Radio

Step 1: Launch App

App opens with splash screen, then main screen loads

Schedule and prayer times fetched automatically

Step 2: Start Playback

User presses Enter/OK on remote or clicks Play button

Status shows 'Connecting...' then 'Live' when streaming

Play button turns red with stop icon

Step 3: Stop Playback

User presses Enter/OK again or clicks Stop button

Stream stops, button returns to gold play icon

Error Handling

If primary stream fails, automatically falls back to secondary stream

Status shows 'Error - tap to retry' if both streams fail

4. User Flow: Prayer Times & Azan

Prayer Times Display

- Shows 6 prayer times: Fajr, Sunrise, Dhuhr, Asr, Maghrib, Isha
- Hijri date displayed above prayer times
- Next upcoming prayer highlighted in teal
- Refreshes every 5 minutes

Location Toggle

- Default: Cairo, Egypt prayer times
- User clicks 'My Location' button to switch to local times

- Uses browser geolocation API, falls back to Stockholm
- City name shown in Arabic via reverse geocoding

Automatic Azan

- At each prayer time, app checks every 30 seconds
- Radio stream pauses, Azan plays (Sheikh Mustafa Ismail)
- After Azan ends, radio stream resumes automatically
- Each prayer triggers only once per day

5. Remote Control Navigation

Supported Controls

Enter/OK: Toggle play/stop radio stream

D-pad navigation: Move between Play button, Location button

Back button: Exit app (handled by webOS)

Accessibility

All interactive elements are focusable

Focus states clearly visible with glow effects

Large fonts for TV viewing distance

High contrast color scheme (dark background, gold/teal accents)

6. Data Sources & APIs

Live Radio Stream

Primary: HLS stream from misrquran.gov.eg (official)
